Bespoke Stainless Steel Cabinets for a Technology Innovation Centre

What made the client contact cleanroomshop.com?

CPI recently took advantage of cleanroomshop.com's bespoke stainless steel service when they were looking for storage cabinets for their cleanroom area.

CPI got in touch as they needed bespoke stainless steel storage cabinets. We listened to their requirements and provided a tailored solution and costs. CPI were happy with the competitive quote offered by cleanroomshop.com and placed an order.

How did cleanroomshop.com help the client?

Following CPI's approval of a technical drawing, the cabinets were manufactured and delivered to CPI within our standard lead time of 10 working days from approval of drawings.

What was the result?

One satisfied client...

"The service we received from cleanroomshop.com was first class as always, with a very prompt response from initial query right through to delivery of goods... I have no reservations in approaching cleanroomshop.com in the future for further bespoke items".
