Materials

Electropolished Stainless Steel Grade 304

Construction/Material

Electropolished stainless steel

Height

450mm

Applications

Developed for use within Cleanrooms Federal Class 10 - 100,000

Country of origin

Israel

Technical data

Benefits of electropolishing:

Improves corrosion resistance - no crevice / pitting erosion

Improves surface smoothness - levels microscopic peaks & valleys

Improves surface reflectivity and brightness

Hygienically clean surface - resistant to microbial growth

Easier Cleaning - less friction & drag

Less Particles - no distortion or peeling

Aesthetically appealing - chrome-like appearance

Polishing & passivating inaccessible areas due to electropolished method

Packaging

Shipped flat-packed, easy to install

Sterility

Non-Sterile

Disposal

100% Recyclable
